

Reliable, Local PLC Services

ALL Brands, ALL Industries

- Is your one-person PLC shop not meeting your needs?
- Do you need expert PLC and control logic support?
- Are you hesitant to work on your own PLCs?
- Do you have obsolete systems and need help finding a path forward?

If any of these scenarios describe your situation, schedule a free Site Walkdown today with Control Associates. Our experts can provide a variety of services for most leading PLC systems. Explore our full capabilities. If you don't see what you need, please ask.

OUR PLC ENGINEERING EXPERTISE

Onsite Troubleshooting

Our team can provide troubleshooting to determine and resolve issues with individual PLCs, or with networking between PLCs and other interfaces.

System Design & Planning

We have the tools and the knowledge to determine the optimal design and layout for your process and can prepare a detailed proposal to address your needs. We can also provide the necessary project documentation.

Specify/Supply PLC Hardware & Software

We can be your single source for specifying and supplying leading equipment brands and software platforms, in addition to providing our PLC services.

Migration/Upgrade Support

We have the knowledge and ability to help you transition from an older/obsolete PLC or system to a newer platform. We'll help you with every step of the process, including reverse engineering of the existing PLC logic.

PLC Configuration & Interfacing

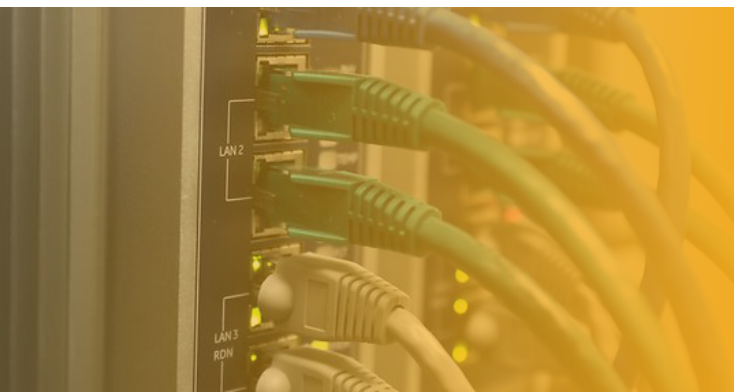

We will complete all aspects of PLC software configuration and internal testing, ensuring that your systems are working properly and efficiently.

Panel Design & Fabrication

Our team can design and fabricate industrial control and power distribution panels to satisfy your specific process requirements, as well as perform Factory Acceptance Testing (FAT).

Onsite Support & Commissioning

We can provide device commissioning, loop checks, and other start-up support services to ensure that your PLC is operating smoothly and as planned.

Control Associates supports a variety of PLCs from many industry leaders, such as Emerson, Allen-Bradley, Automation Direct, and Siemens. And we're local!
